- [Configuration Example](#)

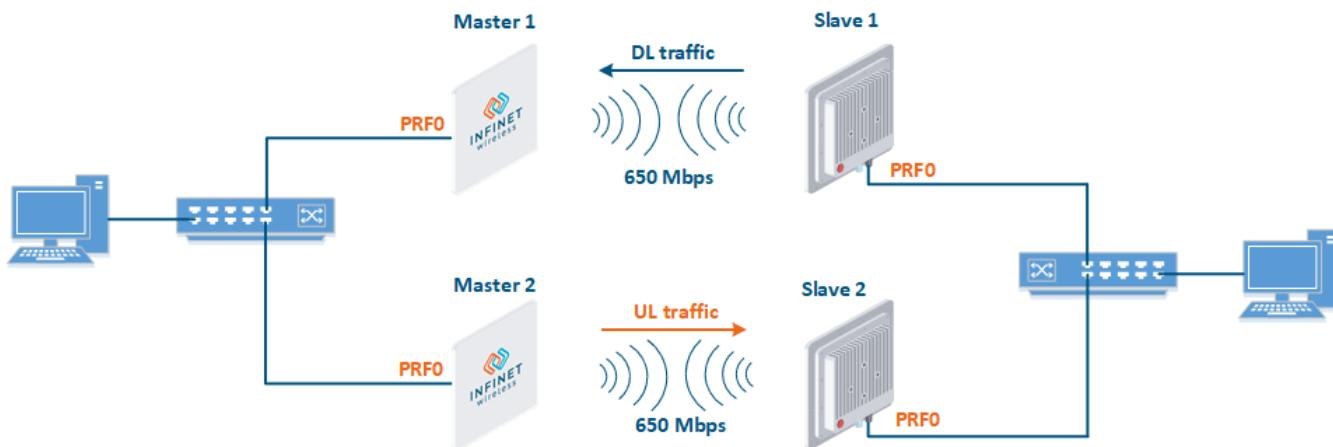

CAUTION

Configurations from the scenarios below are examples that demonstrate the potential capabilities of the Infinet Wireless devices. The configurations may vary depending on the model and firmware version. We do not recommend copying this solutions to the hardware without checking.

Description

The radio link always works in Half Duplex mode. However, MINT technology allows organizing Full Duplex.

Configuration Example

A management is VLAN 100 in switch group #100. A transport of user data is in switch group #1.

- Configure Master 1 and Slave 1 as the main link.

- Configure switch groups.

Attention

If you do not exclude the interface eth0 on one of the devices or do not enable STP, then there will be a loop.

Master 1

```
switch group 1 add eth0 prf0
sw group 1 stp on
switch group 1 start
```

switch group 1 start
```

Slave 2

```
switch group 1 add eth0 prf0
sw group 1 stp on
switch group 1 start
```

- Configure links cost in MINT domain.

Master 1

```
mint rf5.0 -extracost 1000
```

Slave 2

```
mint rf5.0 -extracost 1000
```
